PROFILE

I am a full stack web developer with experience in developing front-end and back-end systems. I build high quality websites that meets with your business goals.
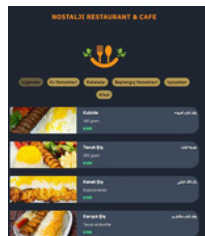

EXPERIENCE

2022 May - Present

FRONT END DEVELOPER - CITADELI

Built dashboard for company employees.

Technologies I used: **React, Typescript, Git, Material UI.**

PROJECTS

RESTAURANT MENU

It is a restaurant menu I made for a restaurant. Customers can enter the website by scanning the QR code.

HARDCODE

A platform where users can improve their programming skills by solving tasks. They solve various tasks in different programming languages and earn experience points.

PERSONAL BLOG

My personal blog where I share my blogs. I made this for coding competition.

CHAT APP

A simple chat application I developed while learning VueJS. By entering your name and the name of the room you want to join, you can message the members in that room.

Languages

Azerbaijan (Native)

Georgian (Full Professional Proficiency)

Turkish (Full Professional Proficiency)

English (Limited Working Proficiency)

OMEGLE CLONE

It is a omegle clone where you are talking with random people. It works just like Omegle.
