Profile

I am a full stack web developer with experience in developing front-end and back-end systems. I build high quality websites that meets with your business goals.

Education

Sep 2021 – present **Tbilisi State University,** *Computer Science* Tbilisi, Georgia

Projects

Jan 2022 – Jan 2022

Omegle Clone
It is a Omegle clone. You are talking with random people. It works like Omegle.
Technologies I used: React, Express, SocketIO, PeerJS

Aug 2021 – Sep 2021

Personal Blog
This is my personal blog that I coded for coding competition.

Features I coded:
1. You can login with Google, Twitter and GitHub accounts.
2. Multi-language support. (i18n)
3. Posts are divided into categories. (game, mobile, software etc)
4. You can leave comments on posts and like them.
5. Voting feature on posts. 6. Point system. You will receive points for your actions. When you reach 100 points, a check mark will appear next to your profile name.
7. Discover page. You can discover and filter posts.
8. When you enter the profile of other members, you can see what posts they have liked and what comments they have made recently.
9. You can change your profile image, bio and username.

Mar 2021 – Apr 2021

Reddit Clone
It is a Reddit homepage UI clone. I made this to improve my HTML, CSS and Javascript skills.

Technologies I used: React, styled-components

Feb 2021 – Feb 2021

Chat App
A simple chat application I developed while learning VueJS. By entering your name and the name of the room you want to join, you can message the members in that room.

Technologies I used: Vue, Express, SocketIO

Nov 2020 – Jan 2021

HardCode
A platform where users can improve their programming skills by solving tasks. They solve various tasks in different programming languages and earn experience points.

Technologies I used: React, Redux, TailwindCSS, Express

Professional Experience

Apr 2022 – Apr 2022

Freelance Web Developer, *Nostalji* Remote
This is my first freelance project. I made this for a restaurant called "Nostalji" in Turkey. Customers can enter the website by scanning the QR code. A few thousand people visit the site every day!
